

Metal Sign & Label ABP & HIN plates are made from the highest quality anodised aluminium with the text and graphics embedded into the anodic layer and protected by a sapphire hard surface. Plates are not affected by exposure to salt water or sea spray conditions. The plates will resist abrasion, chipping and most industrial solvents and chemicals.

Plates may be printed with variable information or supplied with blank panels ready for you to engrave or punch the variable information into the plate.

Which boats need an ABP?

All boats are required to have an ABP plate with the exception of second hand vessels, an amphibious vehicle, a canoe, kayak or surf ski or similar vessel designed to be powered by paddle, a rowing shell used for racing or rowing training, a sailboard or sail kite, a surf row boat, a hydrofoil or hovercraft, a racing boat, a sailing vessel, a submersible, an aquatic toy. Other exceptions include vessels subject to a Certificate of Survey and Personal Water Craft (PWC) and Inflatable boats provided they comply with other requirements.

Which boats need a HIN ?

All registerable boats in NSW, SA & WA. Boats in other states are not required to have a HIN but it can assist with selling and insuring the boat.

What is a HIN ?

The hull identification number (HIN) is an internationally used series of 15 numerals, letters and a hyphen permanently affixed to a small craft hull which uniquely identifies each vessel. The HIN comprises of Country Code 2 letters, Manufacturers Identification Code 3 letters, Manufacturers Serial Number 5 characters, Month of Production 1 letter, Year of Manufacture 1 number and Model Year 2 numbers.

Plate Specifications

Plate Sizes

ABP Plate 87 mm wide by variable height depending on information required.

HIN Plate 87 mm wide x 30 mm high.

Metal

0.5 mm thick anodised aluminium, permanent adhesive backing.

Print Process

Digitally printed black, permanently imbedded into anodic layer.

Fixing Method & Position

Plates must be riveted, screwed or welded to the boat so as to scar the boat if removed. Plates are self adhesive backed for easy fixing.

Holes are not punched, the positions are marked for correct placement of drill holes at time of fixing.

ABP in a place visible to the operator when setting off

HIN 1 plate on the rear transom & 1 plate in a "hidden" location.

Standards Compliance

Plates comply with relevant Australian & International Standards.

No setup / artwork costs

Small quantities OK

Quantity discounts

Complies with all "Standards"
