# Save your time and money with pre printed VIN plates.

Pre printed VIN plates will save you time and money by making it easier to include all required statutory information printed into one plate. Reduce mistakes with only the variable information easily added using a hand held engraver or letter punches. Printed sequential VIN numbers make the task easier

Keep advertising your business name for the life of the trailer. Include your logo and use the VIN plate to promote your business.

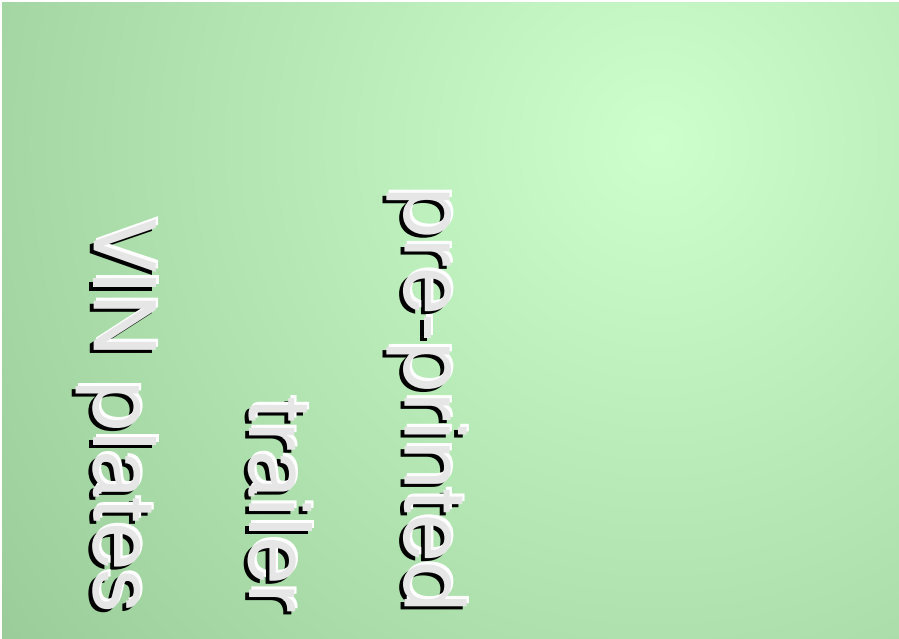

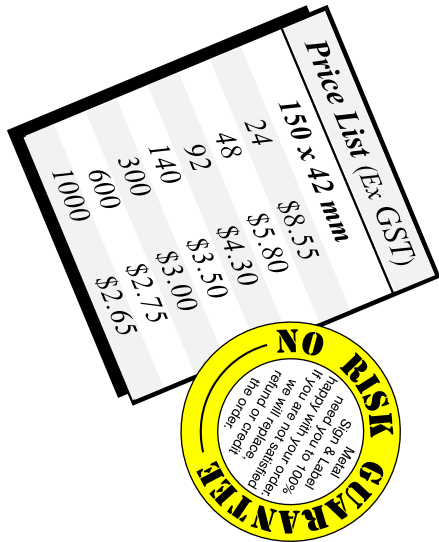

Metal Sign & Label VIN plates are made from the highest quality anodised aluminium with the text and graphics embedded into the sapphire hard anodic layer. The plates will resist abrasion, chipping and most industrial solvents and chemicals.

Free artwork and set up with no requirement to purchase massive quantities. Quantity discounts are available.

Make your life easier by having us pre print as much variable information into the plate, including the sequential VIN number. No mistakes or wastage with a professional finish.

VIN Plate Specifications	
Size	150 x 42 mm
Thickness	0.50 mm
Material	Anodised aluminium
Print	Permanently embedded within anodic layer
Holes	Hole positions marked, not punched
ADR Compliance	Metal Sign & Label VIN plates <b>do comply</b> with the relevant Australian Design Rules.
VIN Plate ADR Requirements	
<p>All trailers less than 4.5 tonnes aggregate trailer mass must have a durable non-corrosive metal plate permanently affixed to the trailer; in a prominent position, by tamper proof rivets, hammer drive screws or welding. The plate must be legible and embossed, indented, etched or engraved in letters and numbers not less than 2.5 mm high. A copy of the Australian Design Rules for motor vehicles and trailers is available if requested.</p> <p>Source: Dept. of Transport and Communications</p>
